

Research

<https://vsant.org.au/find-a-position-search/>

The screenshot shows the homepage of the Volunteering SA website. At the top, there's a banner for the 'SA State Volunteering Conference'. Below the banner, the Volunteering SA logo is on the left, followed by a search bar and a 'Donate' button. A decorative graphic of grey circles is on the right. The main content area has a heading 'Search and express your interest online'. Below this is a search form with fields for 'Keyword' and 'Location', and a 'Search' button. Further down, there are sections for 'Service focus', 'Good for', and 'Interests', each with dropdown menus. The main content area displays two volunteer opportunities: 'Maintenance and Support' and 'Craft'. Each listing includes a small logo, a brief description, and three bullet points on the right side.

Good:

- Style
 - Text font is easy to read
 - Colour choice is simplistic but easy to follow (titles are underlined in the theme colour - dull red; text is a dark grey making it softer on viewers' eyes, unlike like black and white)
 - Colour follows standard website design, e.g. the links are highlighted in blue
 - Volunteering options are easy to scan through: small blurb under the heading, on the right of each post there are:
 - three key points/tags are on the right (type of volunteering, time commitment/regularity, location)
 - has the logo on the side to easily identify the organisation that runs the volunteer program
- Structure
 - Follows standard website structure, header, footer, search bar at the top (which increases ease of use for users because they are familiar with the layout)
 - Listing all volunteer offerings is useful as the initial position page as it allows the users to have a brief scan of different volunteering options before narrowing down their search field
 - Useful that volunteers can narrow down their search field with drop down menus
 - Useful that the volunteer page lists volunteer options as a brief snapshot with their small bio, and that each option can be clicked on change the page to show the opportunity with further information and an Apply button.
- Features

- The menu item the user is currently on has a changed text colour to the theme colour of the dull red, and is underlined. Helps the users know what page menu they are currently on.
- Displays the number of search results that match criteria, helps the user know if it is limited or in plentiful supply

Bad:

- Style
 - Could make use of symbols to increase readability/scannability and make the page less text heavy
 - The title of the volunteer opportunities is in a smaller font than the description. The title then does not stand out to users.
- Structure
 - The drop down menus for narrowing down the search field of volunteering opportunities allows multiple options to be selected, however, the field will display the number of options selected but not their titles. This makes it difficult on the user as they must remember which options they chose, unless they re-click the option field to see their selected categories.
 - Difficult to understand the difference in the two search bars and why the one search button relates to both fields yet lies on the first search bar.
 - There is no log in/sign up option for users, to apply for jobs a user must make an expression of interest and fill out a form. Having an account would streamline this process as there would be no repeat forms
 - No option to register as an organisation or to upload a volunteering event (this page is for people to volunteer)
- Features
 - Does not include breadcrumbs, which would have been useful for a user to locate where they are in the “map” of pages

What to implement to our page:

- The menu item the user is currently on has a changed text colour to the theme colour of the dull red, and is underlined. Helps the users know what page menu they are currently on.
- Displays the number of search results that match criteria, helps the user know if it is limited or in plentiful supply
- Volunteer options contain small descriptions of the event along with the organisation they are part of as well as three tags that display the volunteer opportunity
- Header, search bar, body, footer
- Drop down menus to narrow search results

<https://govolunteer.com.au/volunteering/in-adelaide-sa?page=2>

The screenshot displays the GoVolunteer website interface across four main sections: a top navigation bar, a search results page, a detailed opportunity page, and a call-to-action section.

Top Navigation Bar: Home, Find Opportunities, Find Organisations, About Volunteering, Find Volunteers.

Search Results Page: Shows 408 opportunities in Adelaide SA. Filters include Location (Adelaide SA), Type (Online / Remote opportunities), and Refine your results (Category: All, Animal Welfare, Arts & Culture, etc.; Day & Time: All, Mornings, Afternoons, Evenings, Weekdays, Weekends; Commitment: Any Time, One off - a few hours, One off - an event, Regular - less than 6 months, Regular - more than 6 months; Suitable for: All, Centrally Volunteers, Families with Children, etc.; Type of work: Anything, Accounting & Finance, Administration & Office).

Detailed Opportunity Page: Beauty Workshop Volunteer - Adelaide for Cancer Patients Foundation Ltd. ID: 198702. Details: Community Services, Regular - more than 6 months, Location: Adelaide SA. Description: Look Good Feel Better is a free national community service program run by the Cancer Patients Foundation, dedicated to teaching cancer patients how to manage the appearance-related side-effects caused by cancer treatment. Interested users can express interest or print the page. A map shows the location near Coopers Alehouse, La Trattoria Restaurant & Pizza, and The Terrace Hotel Adelaide.

Call-to-Action Section: Post opportunities online! (with a large circular button).

Good:

- Style
 - The current page the user is on is highlighted in the menu bar which makes it easy for users to locate where they are on the website
 - Good use of symbols to convey information instead of making the website text heavy (increases scannability)
- Structure
 - When you click on a volunteer program it brings up a new page:
 - Has a bar underneath the title heading listing the three tags the service falls under (e.g. community service, time commitment, and location), with little icons next to each tag to better understand what they represent
 - extra info about the program under the title heading
 - On the right there is another list of key information:
 - Time required
 - Suitability level for types of volunteers
 - Whether training is provided or not
 - Has a google map of the location of the volunteering (google map API), which makes it visually easier for a user to determine if they can reach the location, instead of having to google it themselves
 - Has two large green expression of interest buttons so the user can easily click it an be taken to another page to fill in their information and submit their interest. Useful to have one at the top of the page, at one at the bottom of the page as the user can either instantly apply, or scroll to read all information and then apply.
 - This layout helps the page be easily scannable to find relevant information
 - Menu bar has easy navigation (home, find opportunities, find organisations, about, etc)
- Features
 - The user is able to see all the options they have selected to refine their results using the checkboxes.
 - User can clear all options they have checked to start afresh
 - Lists the number of search results found, helps the user know if it is limited or in plentiful supply
 - There is a back to search results button, as well as a prev and next button for the expanded page of the volunteer opportunity

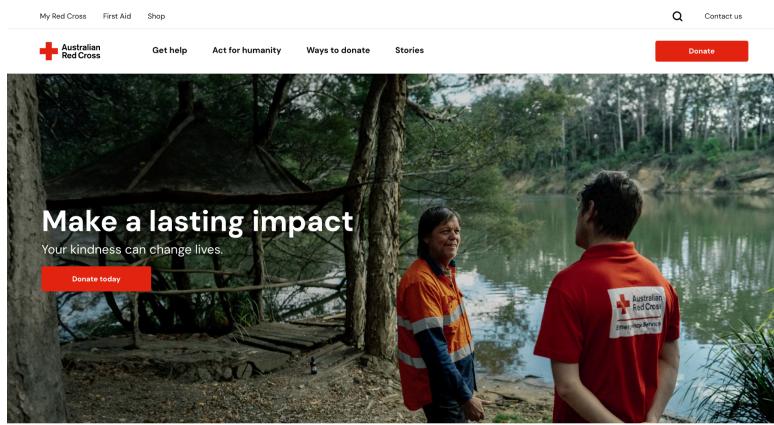

Bad:

- Style
 - Text formatting and styling doesn't appear aesthetically pleasing, not cohesive
 - Text doesn't appear aligned e.g. on the bottom right hand screenshot the circle has uncentred text

- Colour choice is difficult for users to easily read (green against grey and white)
 - Text is too compact in description of volunteer roles and is difficult to read
 - Log in button is grey and do not stand out to the user
- The home page (top left screenshot) doesn't cover the entire screen (hasn't been built for different screen sizes)
- Refine results section is difficult to read as all options are shown at once, making the user scroll down to see all available options
- Image icons for organisations are not consistently sized
- Structure
 - Log in/register buttons are only available on one page, does not follow the standard formatting of login/register in the top right hand corner of page
 - Only organisations can log in or register, not volunteers, which means every time they apply for a position they must refill similar form information instead of it being stored on their account.
 - This page relies on SEEK for organisations to register and post - they must log in and post through SEEK for it to be displayed on this website
- Features
 - No stand out bad features

What to implement to our page:

- List the number of search results found
- Back to search results button, as well as a prev and next button for the expanded page of the volunteer opportunity
- Current page the user is on is highlighted in the menu bar
- When clicking on the volunteer opportunity a new page is opened. This new page contains the tags, extra information about the opportunity, key information: time commitment, suitability level and if training is provided, google location of the event, two expression of interest buttons - one at the top and another at the bottom,
- Clear all search filters with a button

Bindaring Clothing Sale Sorting Volunteer - WA
Bassendean WA 6054, Australia • Req #649
Posted: Thursday, 11 April 2024

Good:

- Style
 - Features a 'hero' (large image on home page)
 - Spans the website's home page so grabs attention of the user
 - Creates a **call to action** with the simple red button and minimal text.
 - Further analysis of impact on viewer:
 - Short diction in catch line, secondary perspective to speak directly with the viewer
 - Man is standing with uniform facing the camera, faceless which indicates universal volunteers and suggesting to the viewer that this person can be the viewer themselves if they also donate today
 - Enigmatic and empathetic in purpose, compelling to the viewer to learn more
 - Overall, the website looks cohesive and well put together. Text uses the same font and is appropriately sized. "Donate" button is clearly visible. There is a simple menu bar).
 - Structure
 - Home page
 - Donate button is situated at the top right of the page within the menu bar. The button is very easy to see and sits in a location that makes sense for its purpose.
 - Another donate button sits within the hero image. Having two locations for the same purpose may be somewhat redundant, however it increases the likelihood of the user navigating to the donate page.
 - When hovering above text in the navigation bar, a drop down menu appears, presenting the user with many options of pages to navigate to. This allows for the navigation bar to not become cluttered, whilst still allowing the user to access a wide range of pages directly from the home screen.
 - Job search page
 - Program boxes

- Program name is red and in a larger font than description text
 - Further scannable information is in light grey
 - Posted date is useful to see how recent the post is
 - The description displayed is limited. The “More” button is a good feature to add to expand the displayed text.
 - The apply button is on the bottom right hand corner of each post. It is very easy to identify and click on.
 - Both the more button and the hyperlink take you to another page which provides further detail, very similar to the GoVolunteer webpage.
- Other general notes
 - Follows general website design. The logo sits on the top left, sign up button sits on the top right of the page, has a search bar at the top of the page and a navigation bar. Use of standard website design allows users to feel more familiar with the layout and easily interact with the site.
- Features
 - Can favourite programs that you like
 - Has an advanced search option for the job search page. Allows for the user to more easily search for what they are looking for, whilst keeping the search bar more simplistic for those who are not looking for something too specific.

Bad:

- Style
 - Colour scheme is very simple and cohesive, however the website could be more visually appealing if it were more colourful. The colours used are red, black and white. As two of the three are just neutral colours used, it is not very visually interesting.
- Structure
 - Home page
 - There are two navigation bars, the top bar contains “My Red Cross”, “First Aid”, “Shop”, a search icon and “Contact Us” links. The second navigation bar, which sits right below it, contains “Get help”, “Act for humanity”, “Ways to donate”, “Stories” and the “Donate” button. It is not necessarily bad to have two navigation bars, however it could be confusing for the user. It allows for there to be more clickable text for the user to navigate through, however could be simpler.
- Features
 - No particularly bad features are obvious.

What to implement to our page:

- ‘Hero’ image on the home page
- One RSVP to opportunity button will be in the bottom right hand corner of the page

Seek

The left screenshot shows a detailed opportunity page for 'Falie Committee Member'. The top navigation bar includes 'seekvolunteer', 'Opportunities', 'Favourites', 'Advice & Tips', and 'Find Volunteers >'. Below the title 'Falie Committee Member' and organization logo 'FALIE', there is a description of the role, a list of responsibilities, and a 'Share' button. On the right side, there is a sidebar with categories like 'Largs Bay SA' and 'Museums & Heritage'. At the bottom are buttons for 'Apply' and 'Favourite opportunity'.

The right screenshot shows a search results page for volunteer opportunities in Australia. The top navigation bar includes 'Jobs', 'Courses', 'Businesses for sale', 'Volunteering', 'AU NZ', and 'Find Volunteers >'. The search form has fields for 'What', 'Where', 'Category', 'Type of work', and 'Suitable for'. Below the search form, it says 'Found 10640 volunteer opportunities in Australia' and 'Page 1 of 710'. There is also a section for saving the search with an 'In Demand' button.

Good:

- Style
 - Detailed opportunity page (left image)
 - Colour scheme is nice and works well together visually.
 - Blue and purple are used for subtext as opposed to grey, which helps text to stand out without disappearing into the background.
 - Volunteer opportunities search page (right image)
 - The search boxes are white and of the same sizes. The purple background behind the search bar helps it to stand out, drawing the user's attention. This makes the search bar very easy to identify.
 - The search button is a dark blue, which is also well-contrasted against the background.
 - A consistent font is used. To distinguish between titles and descriptions, different colours and font styling is used (eg bold text)
- Structure
 - Detailed opportunity page
 - Logo of the volunteer organisation sits on the right side of the page
 - There is scannable information on the right hand side in a list structure. The tags have their own symbols and are written in blue text. Helps to summarise the volunteer opportunity to the user so they can quickly gain an impression of the organisation and opportunity.
 - Easy to read and click the big apply button.
 - Volunteer opportunities search page
 - Like other sites it has a list of all opportunities. Each opportunity has:
 - A heading/title of the program as a hyperlink to a page with further detail
 - The tags (with symbols) that the program falls under
 - Small bio description of the program

- Logo of the company in the bottom right hand corner of each opportunity.
- Features
 - Detailed opportunity page
 - Can click on the link to the organisation that posted the opportunity on the detailed opportunity page. Is clear to the user that it will take you to the page with the “>” sign. This link takes the user to a page (still on the seek website) that is dedicated to that organisation, with a small bio and information about this organisation.
 - Good that there is a link stating and linking to the previous page
 - Volunteer opportunity search page
 - Displays how many opportunities appear under chosen categories after search is completed. A good feature for the user so they know how long they will scroll down the page for.
 - Some opportunities also have a “In Demand” title in the top right hand corner, which stands out in purple text. This helps users prioritise which programs they want to apply for. These programs are the first to appear in the list of all programs.
 - Also provides the opportunity to favourite programs by clicking the open heart at the bottom of each program. The heart becomes shaded if favorited. Helps the users to visually scroll through the page and keep track of which programs they are interested in before they apply to certain programs.
 - There is a page labelled favourites where users can tick the a box, either organisations or opportunities, so see what they have previously shown interest in. Good feature to have as it helps users to see all their interests in one place.
 - To access the home page, the user can simply click the SEEK logo in the top left corner of the page.

Bad:

- Style
 - The colours are quite similar, as the two main colours are purple and blue. Having some more contrast may be helpful to make the page more interesting for the users.
- Structure
 - Volunteer opportunities search page
 - Logo of the volunteer organisation is quite small and in the bottom corner within the program boxes. (As in the sections that contain the program name, description and location). A larger icon or in a more prominent location would make it easier for the user to identify organisations they are familiar with.
 - There is no “Apply” button for a program unless the user clicks the title of the opportunity, navigates to the more detailed opportunity page, scrolls

down and clicks “Apply”. To make it easier for the user, there could be an apply button for each program on the search page.

- Features
 - Doesn't have an option to sign in/log in, therefore every time a user wants to apply to a program they have to keep refilling in forms, instead of supplying all their information once and just applying.
 - Doesn't have the option for organisations to sign in and post their own programs.
 - Improvement could be to include breadcrumbs so the users know where they are on the page

What to implement to our page:

- More detailed volunteer page contains a hyperlink to the volunteer organisation's website
- Display total number of opportunities

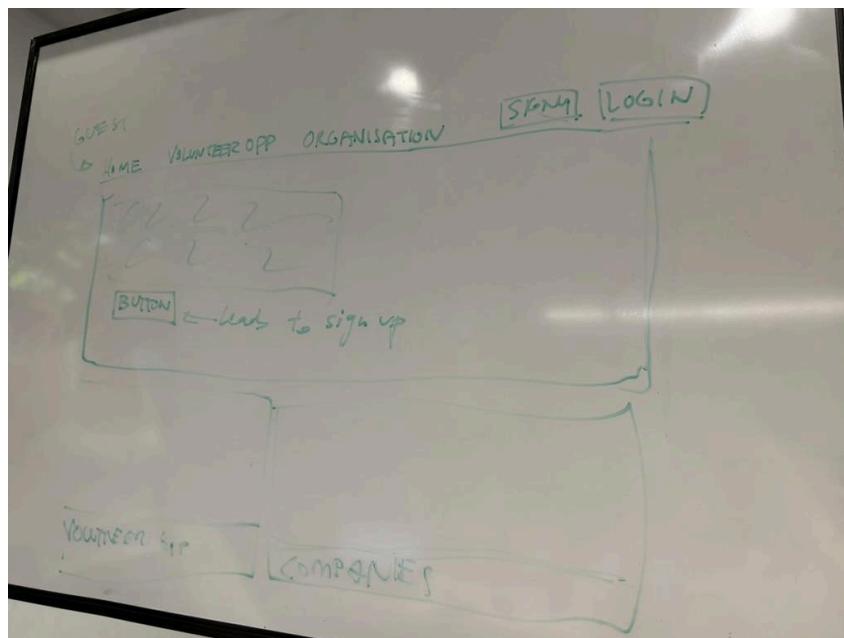

Stages of Planning:

We planned our rough draft of the website in person on a white-board, writing down the features that we wished to implement along side the design before we started designing in Figma as our 'final design'.

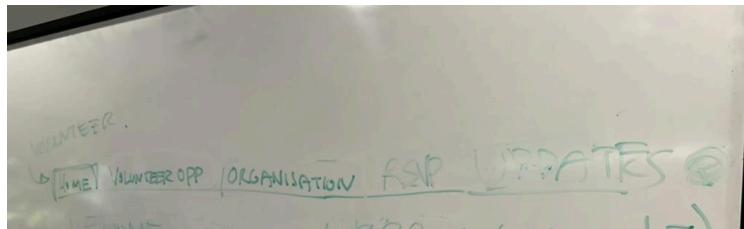

Initial Website Design Plan

Pages:

1. Home page
 - a. Have hero with photo of volunteer, big blue button which says "Volunteer now" (leads to sign up page)

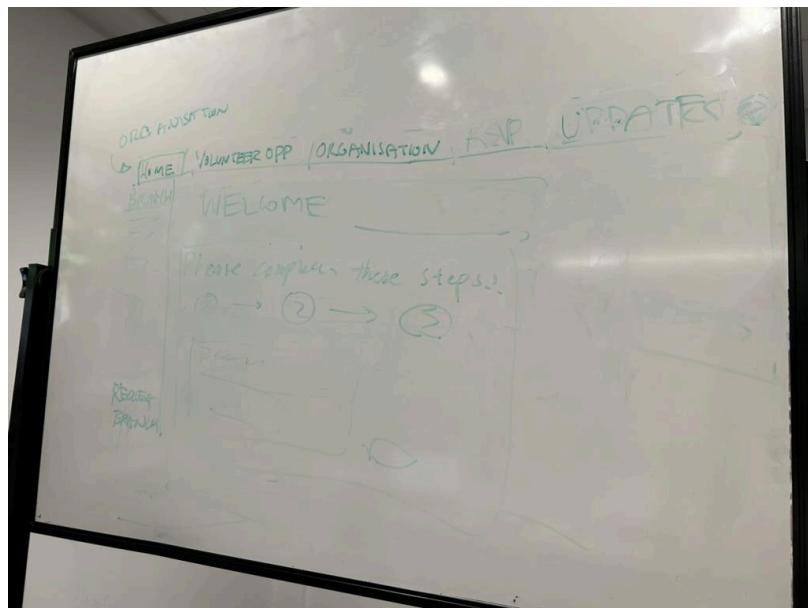

- b. Have most recent volunteer opportunities
 - i. **Logged in User version**
 1. On home page, can see jobs listed in the area specified to the user's details from joined organisations
 2. Jobs listed for what organisations they've joined (filter option for my organisations) m
 3. Scroll down to see recent updates from organisations (like twitter page)

ii. Logged in Organisation version

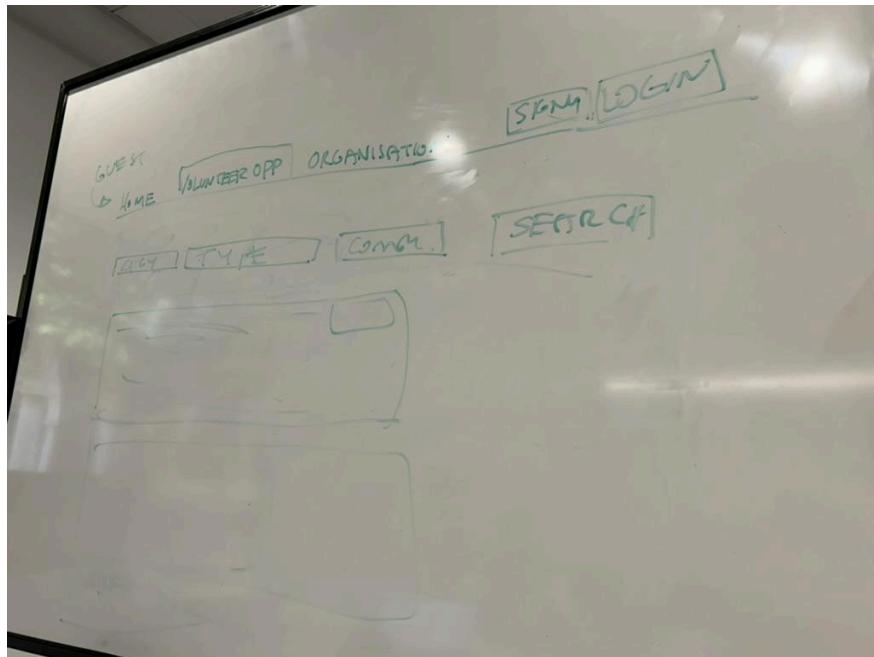

1. When first signed up, have a step procedure (Please complete this before finalising your sign up)
2. Organisation description
3. Optional website link
4. Shows own updates and events (similar to how volunteer works)

iii. Logged in admin version

1. Just the admin panel
2. Log in (top right)
 - a. Username & password sign in box
 - b. Integrate with log in with google
 - c. Attribute in database for whether the person is an organisation or user or admin
3. Sign up
 - a. Tick box whether you are signing up for organisation or user
 - i. When tick organisation, it asks you to write:
 1. organisation name
 2. Company email
 3. Only **one account** can be associated with the organisation
 - ii. When tick user, it asks you to write your first name, last name
 1. Need to provide email (otherwise, sign up with google)
 2. First name

- 3. Last name
- 4. Age/Birthday (unchangeable)
- 5. Location (can reveal jobs nearby)
- 4. Volunteer page (for anyone to see [initially can only see all public events, then once joined organisations, can see those private events as well])
 - a. Selected before pressing search/showing list of all opportunities (default any is selected)
 - i. Categories (can say any, can select multiple, such as aged care)
 - ii. Any commitment (one off few hours, one off event, regular few hours, regular event)
 - iii. Time (weekdays, weekends, hours per week)
 - b. Display the list
 - i. Each item has a title, organisation, brief description, tags they fall under (type, hours, commitment, location)
 - c. If you click RSVP and are not logged in, display red text instructing user to first sign in

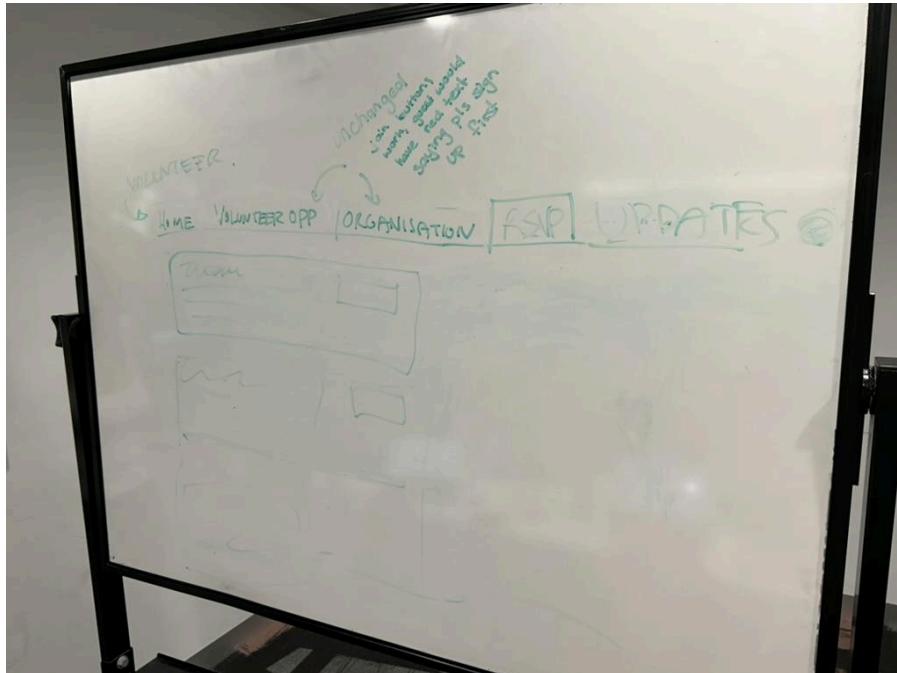

- 5. Volunteer opportunity (reached through clicking on an opportunity in the list on the volunteer page)
- 6. RSVP page
 - a. List volunteer opportunities the user has signed up for (for user account)
 - b.

Title of Commitment (hyperlink to its own page) Organisation	Type (animal welfare etc.)
-----------------------------------------------------------------	----------------------------

Description	Location

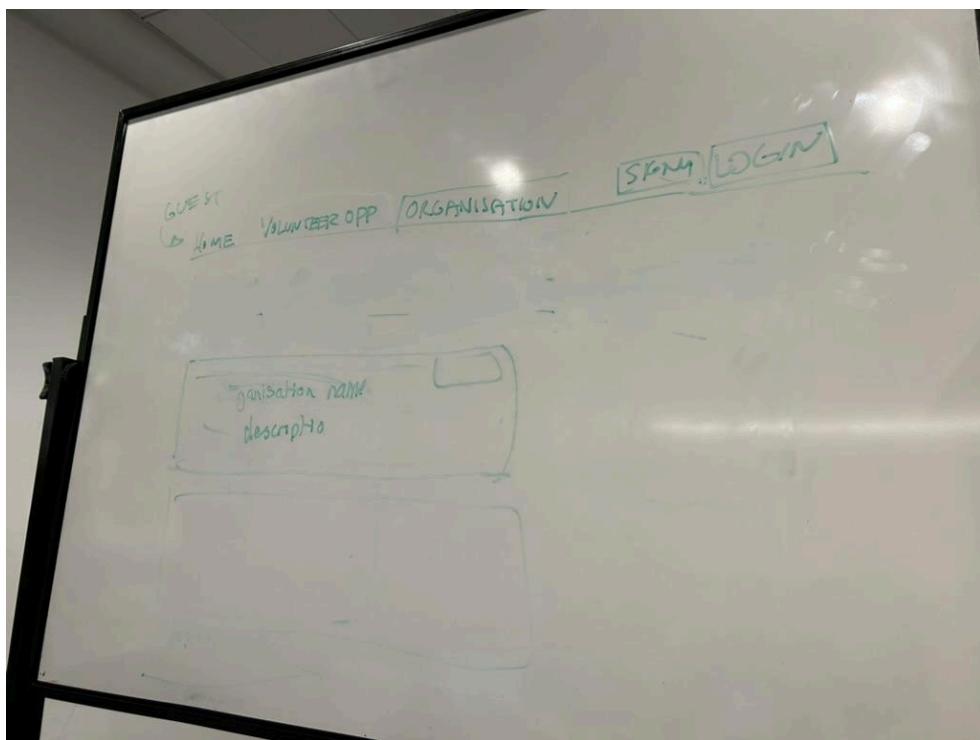

- c. Page for volunteer opportunity:
 - i. Title of Commitment
Organisation (hyperlink to organisation page)
 - ii. Position title
 - iii. Date and duration
 - iv. Larger description of event
 - v. On the right there is extra tags for scannability:
 - 1. Time
 - 2. Location
 - 3. Suitability skills (experienced volunteer, newbie etc)
 - 4. If training is needed/provided
 - 5. Tick box to sign up for new events
 - vi. RSVP button (don't need to fill in any info because all mandatory info is in initial sign up page)
 - 1. Email confirmation if applied successfully
 - 2. After RSVPing, gets directed to a page saying you have RSVP'd successfully, you will receive a confirmation email
 - 3. Tick box on the success page saying do you want to hear further updates for new events from that organisation

7. Find
volunteer

organisations

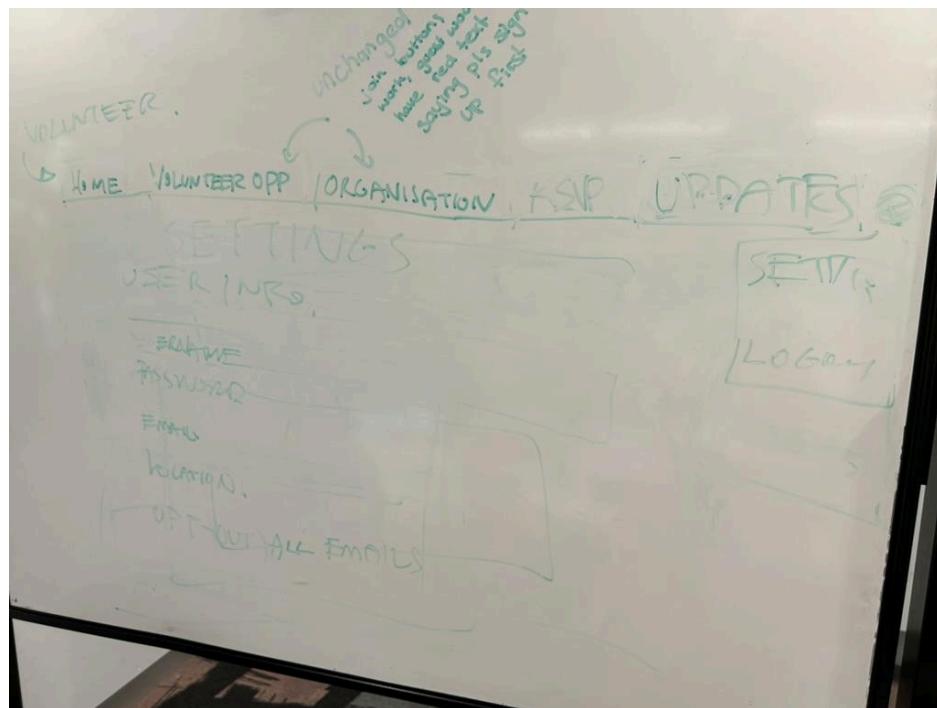

- a. List of companies, tick the ones you want to join
- b. If you click join and are not logged in, display red text instructing user to first sign in

User-specific pages

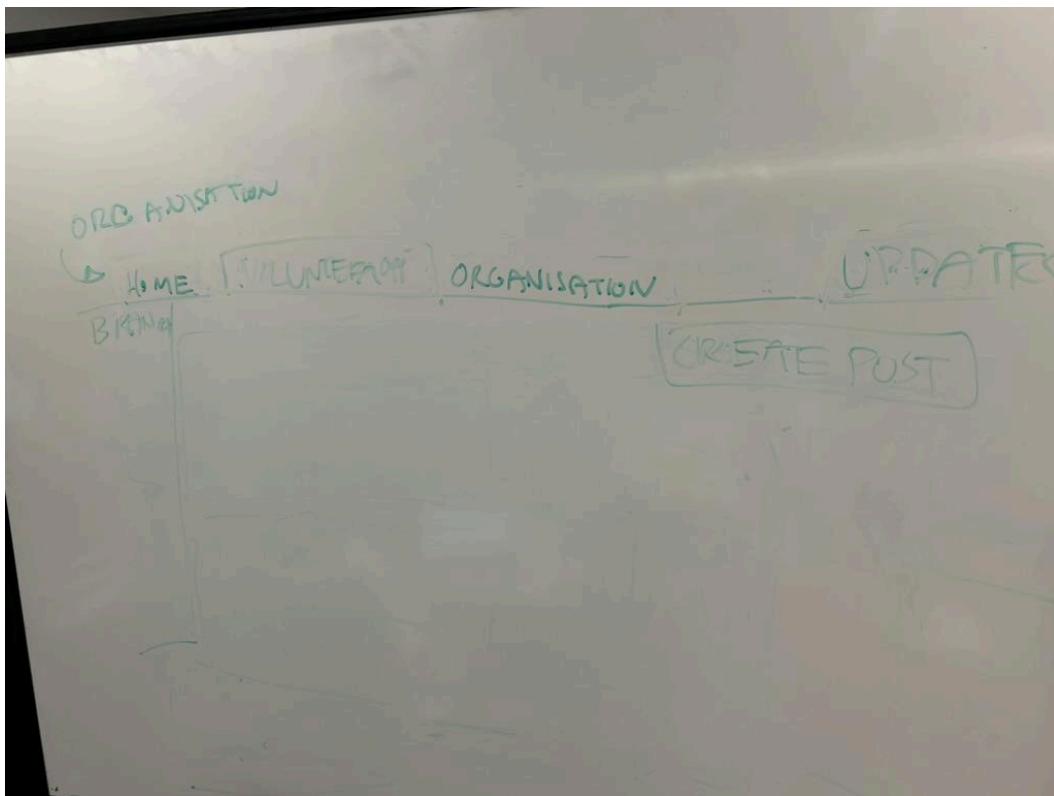

Volunteer:

1. User settings page:
 - a. Can change name, last name, email, location
2. Viewing RSVPed events:
3. View organisations they've joined

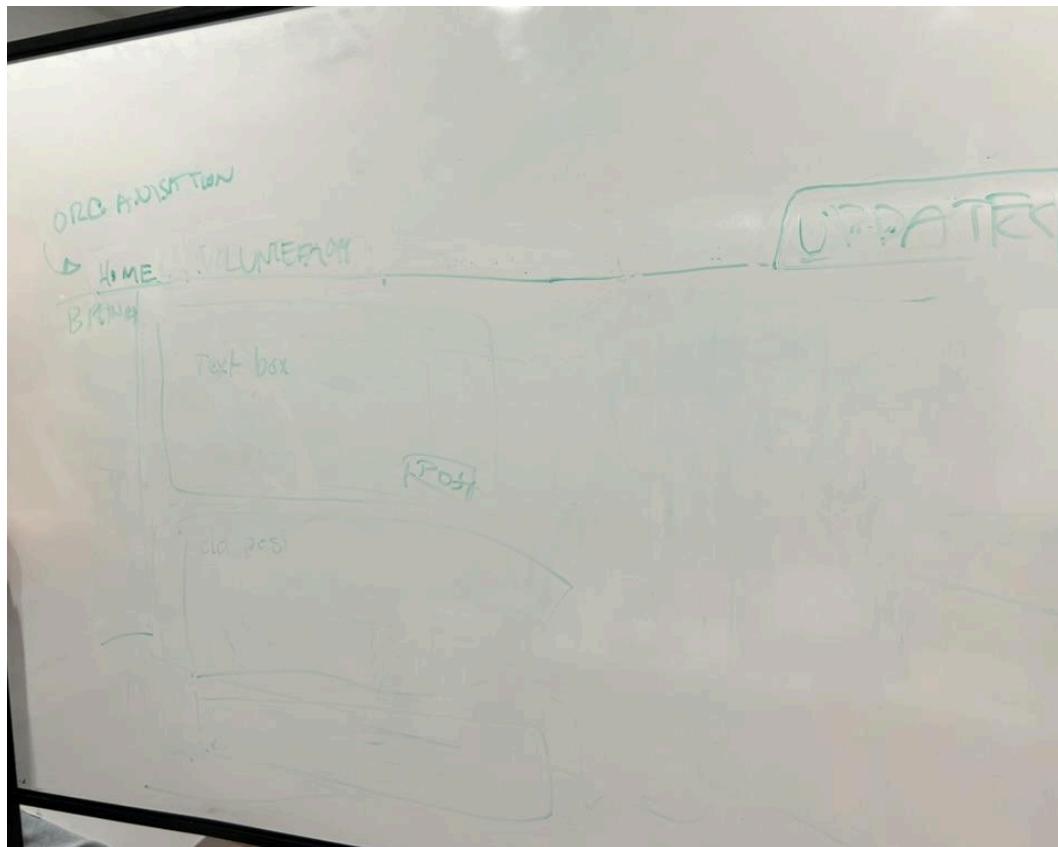

Organisation:

1. Your branches on the left hand side of the screen, branches are listed and the highlighted one is the current branch you are on, an add branch button is below the list of branches
 - a. Add branch button takes you to another page where you can submit a form to the admin, giving information of the branch name and location and new branch index (the whole organisation email remains the same and there is now a new sub email)
2. The programs being run on the current branch selected are listed on the main page, create new post button at the top of the list which takes you to a new page
 - a. Same program description and layout as for regular users, select hyperlink for more info
 - b. When you click hyperlink instead we get a list of all users that have RSVP'd, we can delete users (little bin icon next to each user name)
 - c. There is an email all item which when clicked will prompt a text box to appear and the organisation can write an email and click send which sends the message as an email to all users.
3. Create new post page: which has text box filled in things for the organisation to create their new post, submit button at the bottom

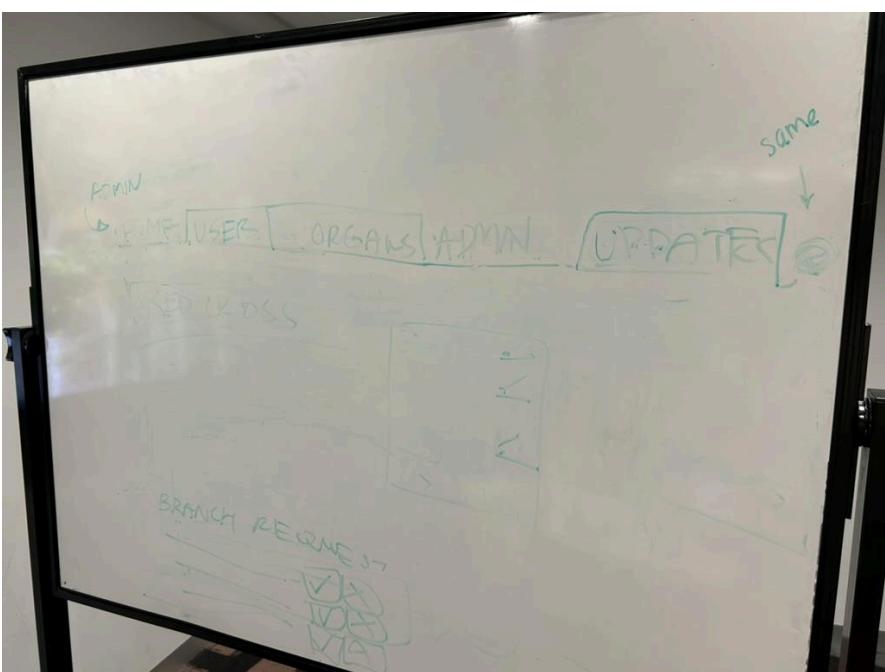

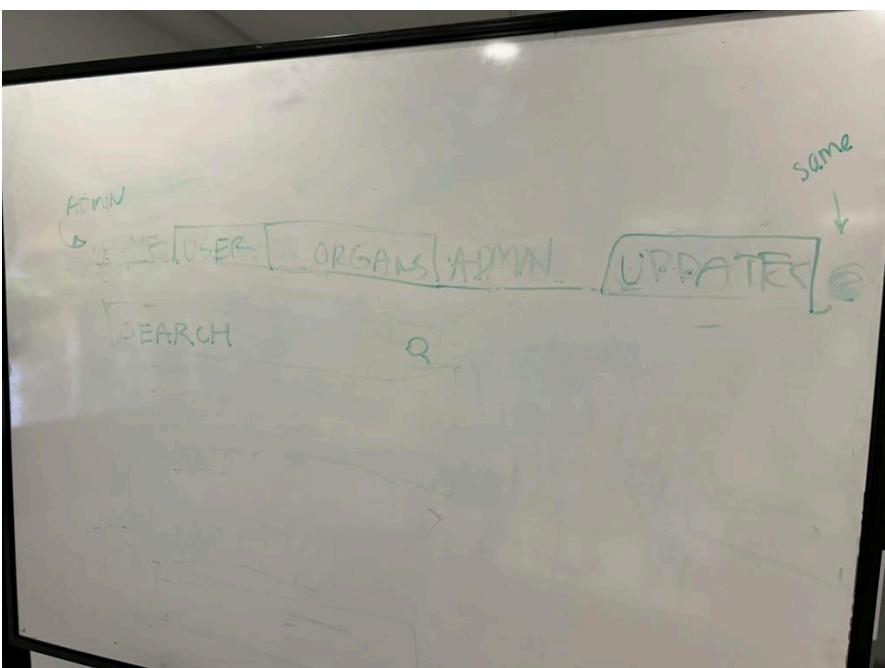

4. Organisation settings page (nav bar)
 - a. Changing descriptions, names
 - b. Managing branches

- c. View all users joined, and can remove these users
- 5. Updates page
 - a. Can post updates, the current branch the organisation is posting on is displayed on the left

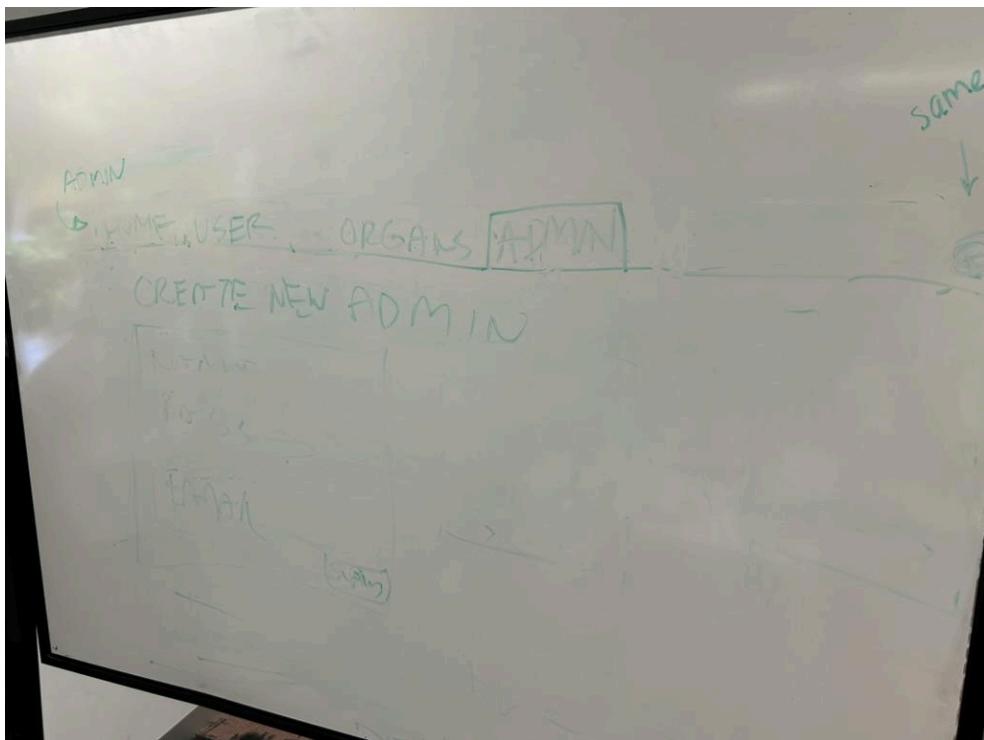

Admin:

- 1. Admin panel:
 - a. Be able to add and remove accounts for users
 - b. Add and remove accounts/branches of organisations
 - i. Organisations can only have one managerial account but can optionally ask admin for other accounts to manage branches
 - ii. Like github branch, the organisation now has an option to click which branch they want to post on (like main, or adelaide branch, or sydney branch, or a suburb branch e.g. norwood)
 - iii. E.g. Red Cross South Australia, or Red Cross Victoria
 - c. Add and create new admins
 - d. Edit your own information (nav bar)
- 2. User Panel
- 3. Organisation Pannel

4. New admin page

Consistent Features across all pages:

1. Navigation bar
 - a. Login and sign up links
 - b. Links to all pages

Volunteer (nav bar):

1. Icon of person which when clicked has drop down of:
 - a. Sign out
 - b. Link to user info (where you can change)

Design Justification

We underwent a review of other groups who aided us in testing the cognitive and kinematic load, thus implementing such features whilst we were designing in Figma. Our feedback consisted of positive reviews of usability and design, with little comment besides some additional features. This consists of:

- Being able to search through users as an organisation if they've joined an event
- Maintaining a consistent primary, secondary and tertiary colour scheme on every page, especially consistency on the buttons and link colours
- Use of symbols in our work

These critiques are implemented into our final design on Figma throughout the design justification. We have included the justification for their cognitive and kinetic load, and hope this critique allows us to create a universally accessible website.

Consistency:

As you notice throughout our design, we have a consistent font size for headings and bodies of text, colours and margins. We have been consistent to ensure that our website is easy to follow for a new user, having consistency means that the user can begin to see common themes which are recurring throughout our pages, which helps to reduce cognitive load. Furthermore, we have also been consistent with utilising common website practices, such as having login/signup in the top right hand corner of the header, to make the user easily navigate our website as they would any other website. Our own design consistencies are as followed:

Consistent font size:

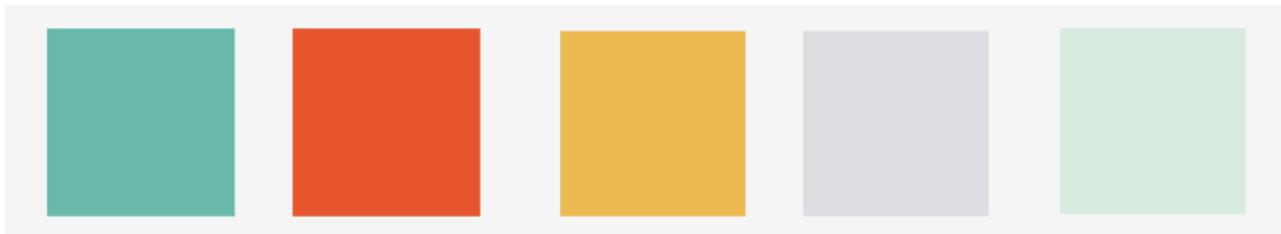

H1: 50px

H2: 32px

H3: 24px

Consistent Colour Palette:

We have used the colours as followed. They differ enough in terms of shade so that regardless of ability to see colour, the website will be accessible.

Highlighting
/confirm buttons

Buttons

Link Highlighting

Boxes

Footer colour

Consistent margins:

Margins are all indented by 175px from the left and right edges of the page for full screen

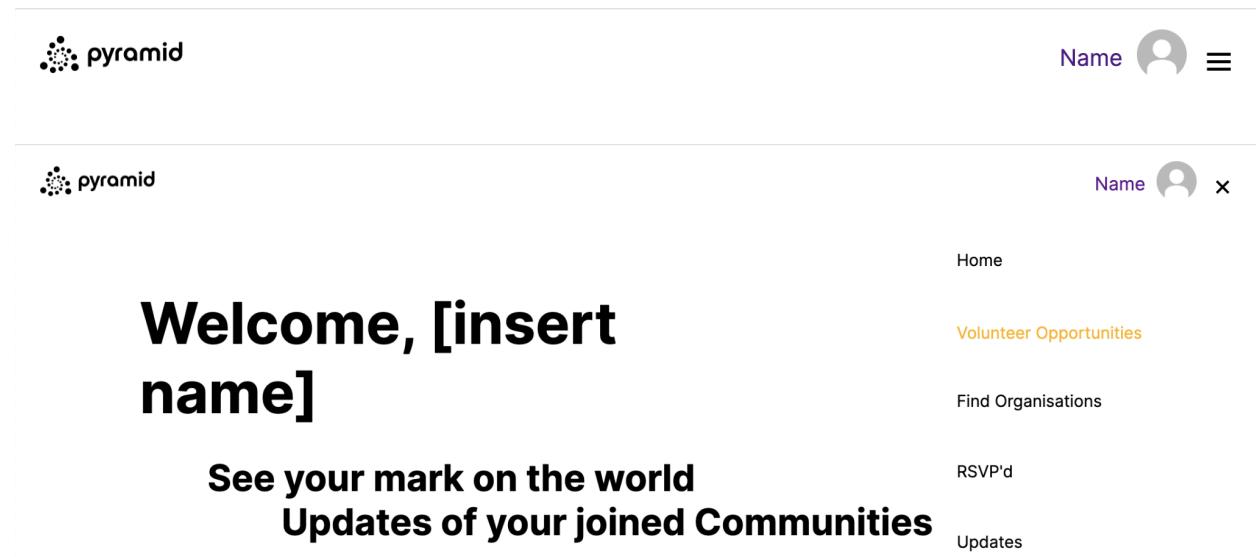

Margins are to have 0 indentation when the screen shrinks to <= 900px wide

Navigation Bar

Though not visualised in this screenshot, the logo of our website will be in the very left of the navigation bar. All nav bars have the current page highlighted in our colour scheme yellow and the page name bolded to increase the cognitive load for the user as they know which page they are on. The nav bar will be visible on all pages, with different page titles depending on how the user is logged in (guest, volunteer, organisation, admin). The kinematic load is also reduced as all the page links are located close together and inline. Furthermore, when the user hovers over a page link it will turn to the yellow colour to reduce cognitive load as it indicates which text will lead to another page.

When the page shrinks in size, we made the header condense into a dropdown menu as seen below. This is visually appealing and reduces clutter, a key element in simplifying the menu especially when the screen width changes. This responsiveness encapsulates the key feature of user experience and accessibility to be universally accessible regardless of screen size.

For all the logged in versions (admin, organisation and volunteer), the profile picture and name are both clickable, thus integrating both visual communication and reducing kinematic load to access the profile details.

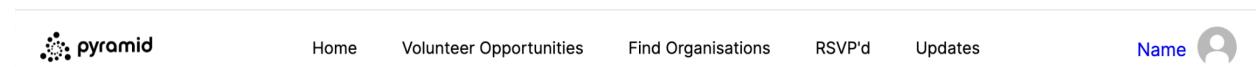

The screenshot shows a mobile view of a navigation bar. At the top right are three icons: a user profile (purple), a search icon, and a menu icon (three horizontal lines). Below this, the word "Name" is followed by the user's name and a small profile picture. The main content area has a large "Welcome, [insert name]" heading. Below it is a call-to-action: "See your mark on the world" and "Updates of your joined Communities". To the right of these are four links: "Home" (yellow), "Volunteer Opportunities" (orange), "Find Organisations" (black), "RSVP'd" (black), and "Updates" (black). The "Home" link is currently highlighted in yellow.

Guest

The screenshot shows a guest navigation bar. It includes the logo, a "Sign Up" button, and a "Log In" button. The rest of the navigation links are standard black text: "Home", "Volunteer Opportunities", "Find Organisations", and "Updates".

Volunteer

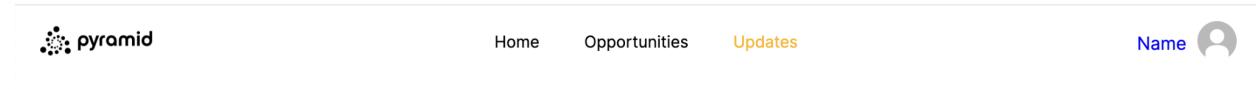

The screenshot shows a volunteer navigation bar. It includes the logo, a "Name" field with a profile picture, and a "Logout" icon. The navigation links are: "Home", "Volunteer Opportunities", "Find Organisations", "RSVP'd", "Updates", and the "Name" field itself, which is currently highlighted in yellow.

Organisation

We have created two nav bars for organisations, to differentiate between a verified and unverified organisation, thus further reducing the cognitive load required.

Verified

Unverified

Admin

Home Page

Home Page/Guest

A screenshot of a website home page for a guest user. At the top, there are navigation links: "Home", "Volunteer Opportunities", "Find Organisations", "Sign up", and "Login". Below this is a large hero image showing a man smiling while holding boxes. Overlaid on the image is a teal banner with white text: "Make your mark, Volunteer with heart.". At the bottom left of the image is a red button with white text: "Volunteer today".

A screenshot of the Australian Red Cross home page. At the top, there are navigation links: "My Red Cross", "First Aid", "Shop", "Australian Red Cross", "What we do", "Get help", "Act for humanity", "Ways to donate", and "Stories". Below this is a large hero image showing people in a boat navigating through floodwaters. Overlaid on the image is text: "We don't walk away when the cameras stop running" and "Because people like you care, we can be there." At the bottom left of the image is a red button with white text: "Donate today".

Site identity and mission represented in hero:

For the guest user, the hero section immediately captures attention and creates a “call to action,” inspired by the Red Cross website. The first page’s aesthetics and message are crucial in engaging the viewer

and encouraging them to explore further, particularly volunteer opportunities and organizations. We drew inspiration from the simplicity and impact of the Red Cross homepage.

Simplicity:

- The statements are brief and impactful, using short vernacular. This conciseness ensures the message is communicated easily and efficiently, reducing cognitive load and making it straightforward for users to understand without delving deeply into the website's content.

Importance:

- The website's key purpose is to allow users to browse multiple volunteer organizations and opportunities. A large, unmissable red button instantly directs users to the Volunteer Opportunities page, enabling them to start their search for volunteering opportunities immediately. Positioned right below the main message, this design choice, inspired by the Red Cross page, effectively communicates the mission and purpose of the website.

Kinematic and Cognitive Load:

- By simplifying navigation and using concise language, we reduce cognitive load, making the site easier to understand and navigate. The prominent red button reduces kinematic load by minimizing the actions required to find volunteer opportunities, enhancing the overall user experience.

Quicklinks — Ease of navigation

A home page is not successful if it is not efficient and succinct. Right below the hero section, quicklinks with large clickable images attract the user's eye, providing easy visual communication to the main pages: Volunteering Opportunities and Organizations. These two large image divisions are simple and require minimal kinetic and cognitive load due to the favourable ratio of text to image.

We chose this design, inspired by the Red Cross website's links below the hero, without additional text. We believe that, unlike the Red Cross site which includes empathetic text, our home page benefits more from these straightforward clickable images as they serve different purposes. In our case, we utilise these clickable images to easily direct the user to the subsequent pages, whilst Red Cross utilises them as a form of persuasion to donate to their cause.

Kinematic and Cognitive Load:

The large clickable images reduce cognitive load by making navigation intuitive and straightforward. The minimal use of text decreases kinetic load, ensuring users can quickly and easily access the main pages with minimal effort.

Find your local volunteering opportunities today! | 

EMERGENCY SERVICES
What being there looks like when disasters strike

Video: Red Cross stands shoulder to shoulder with a community as it recovers from record flooding in the wake of a cyclone.

Company Statement, Empathy and relatability

Why volunteer?

Volunteering involves giving your time, skills, and energy to help others or contribute to a cause without expecting monetary compensation. It can take various forms, from serving meals at a local shelter to tutoring students, participating in environmental clean-up efforts, or assisting in community events.

1. Community Impact	2. Personal Growth	3. Social Connection
Volunteering allows you to directly contribute to the betterment of your community by addressing critical needs such as hunger, education, or environmental conservation.	Through volunteering, you can develop valuable skills, gain new experiences, and expand your perspective by interacting with diverse groups of people and facing new challenges.	Volunteering provides opportunities to connect with like-minded individuals who share your passion for making a difference, fostering a sense of belonging and camaraderie within your community.

Although seemingly simple, the inclusion of three cards of information fosters empathy and relatability for the user. Using language like a rhetorical question in the heading further engages the user's interest. These three cards, employing the tricolon technique, feature easily memorable phrases that advocate for volunteering and thus, utilizing our website, creating authenticity in the user's identity. Authenticity breeds loyalty, a key factor in user retention.

Icons for Quick Visual Communication:

- Icons are strategically used for quick and easy visual communication, aiding users in digesting information rapidly. By incorporating icons alongside text, we improve the scanability of the webpage, enhancing overall user experience. The universality of icons transcends language barriers, increasing the website's reach and accessibility.

Kinematic and Cognitive Load:

The use of icons reduces cognitive load by providing visual cues that aid in understanding. This, coupled with concise language and strategic placement, minimizes the effort required for users to engage with the content. Additionally, the intentional use of icons and images throughout the website enhances kinematic load, making navigation intuitive and efficient.

Crowd mentality/Bandwagon impact

The screenshot shows a website header with a light green background. At the top, there is a dashed rectangular box containing the text: "So, what are you waiting for? Join the [user count] volunteering with us today!". Below this box is a red "Sign up now" button. The main content area has a white background. At the top of this area, there is a horizontal navigation bar with links: "Home", "Volunteer Opportunities", "Find Organisations", "Contact Us", "Sign up", and "Login".

We harness the bandwagon effect through the user count and a rhetorical question. By highlighting the current number of volunteers, we leverage social proof, instilling trust and legitimacy in the user. Accompanied by a prominent "Sign Up Now" button strategically placed below, we encourage users to join the crowd and sign up as volunteers. The phrase "Join us today" creates a sense of urgency, urging immediate action and reinforcing the bandwagon effect by prompting visitors to act quickly to become part of the website's community.

Kinematic and Cognitive Load:

The strategic placement of elements such as the user count and the "Sign Up Now" button reduces cognitive load by guiding users' attention and simplifying the decision-making process. Additionally, the use of clear and concise language minimizes cognitive effort, making it easier for users to understand and respond to the call to action. This, coupled with the sense of urgency created by the message, enhances kinematic load by prompting users to take swift and decisive actions.

The screenshot shows the "Home page/volunteer" section of the website. At the top, there is a navigation bar with links: "Home", "Volunteer Opportunities", "Find Organisations", "RSVP'd", and "Updates". Below the navigation, there is a large "Welcome, [insert name]" heading. To the right of the heading is a section titled "Updates of your joined Communities" which lists three "Important Update" items. Below this is a section titled "Find your local volunteering opportunities today!" which includes a small icon of a hand holding a heart. At the bottom of the page are two cards: "Volunteering Opportunities" and "Volunteer Organisations", each featuring a thumbnail image and a title.

Home Page/Volunteer

Personalized Welcome and Timely Content:

- Upon logging in, we aim to provide the volunteer user with an immediate sense of personal welcome. Addressing them by name in the main heading, "Welcome, [user name]," adds a touch of humanity and bespoke treatment, fostering a genuine and curated feel to the website. This personalized approach ensures that users feel valued as individuals rather than mere numbers.

Efficient and Purposeful Homepage:

- As part of the community, volunteers no longer need indoctrination through a hero section. Instead, the homepage focuses on efficiency and conciseness. Timely content, such as the most recent volunteering

opportunities and updates from followed organizations, replaces the hero section. This dynamic content encourages repeat visits by refreshing whenever new volunteering events are added. Serving as both a timetable and an interactive feature, this content keeps users engaged and informed.

Kinematic and Cognitive Load:

The streamlined presentation of content reduces cognitive load by presenting the updates and the volunteer opportunities in a clear and easily digestible manner. By displaying condensed updates and opportunities with links to full posts the instant of opening the website, we further minimize cognitive effort while providing users with quick access to relevant information. This strategic design enhances kinematic load by facilitating smooth navigation and interaction with the website's features.

Personally Catered

You've joined [insert number] of people making a mark on this world.

Volunteering is difficult, we understand that. But remember, sometimes times can be tough and you need a break. If you use up all that empathy and kindness for everyone else, who will take care of you?

1. Stay hydrated

Regular water breaks are crucial in keeping you healthy and in the right health to take care of others.

2. Take it easy

Volunteering can be physically demanding. Even if you push through it with your best attitude, take time for a break, time for yourself.

3. Ask for help

It can be confronting sometimes. Check in on yourself, and if you need further support, or feel unsafe to yourself, please contact below.

insert email for website support

Support

Lifeline
Beyond Blue

Personalized Engagement:

- By highlighting the user's contribution and community impact ("You've joined [insert number] of people making a mark on this world"), we strengthen the sense of belonging

on the platform while furthering the bandwagon effect. This encourages users to return for further engagement with others who share similar values and goals. Acknowledging how users 'make a mark on this world' puts them on a pedestal, enhancing their sense of importance and connection to the platform.

Empathetic Treatment and Repeat Visits:

- Mirroring the guest's tricolon approach, we employ the same technique on the volunteer homepage. However, instead of convincing guests to join, this encourages repeat visits by fostering a sense of community, empathy, and self-care. The initial description acknowledges users' contributions, while practical tips and support contacts at the bottom of the page provide valuable resources for volunteers seeking connection and guidance. This personal touch enhances the user experience, making the platform more inviting and supportive.

Kinematic and Cognitive load:

The streamlined design and empathetic language reduce cognitive load, creating a more engaging user experience. By highlighting the user's contribution and community impact, we foster a sense of belonging and encourage return visits. Strategic placement of support contacts and practical tips facilitates smooth navigation, optimizing the user experience and promoting user retention.

Home page/organisations not finished

The screenshot shows a user interface for a volunteer organization's home page. At the top, there are navigation links for 'Home' (highlighted in orange), 'Volunteer Opportunities', and 'Updates'. A placeholder for 'Name' is shown. Below the navigation, a large 'Welcome, [insert name]' message is displayed. To the right of the name placeholder is a 'Current Branch ▾' button. A central callout box contains the text: 'Before you can start posting, please complete the following steps' with a numbered list: 1 (checkmark icon), 2 (arrow icon), and 3 (circle icon). Step 1 is labeled 'Fill in company description' and has a large input field below it. A 'Submit' button is at the bottom of the callout. At the very bottom of the page, there is a footer section with links: 'Contact us', 'Request Branch', 'Create Event', and 'Create Update', each followed by a right-pointing arrow. The footer also includes small text about account control and event creation.

Home Page/Organisation

Streamlined Signup Process:

- The signup process for organisations can be lengthy and overwhelming. To alleviate this, we've split it into multiple steps, allowing organisations to complete it at their own pace. This approach respects their time and effort, demonstrating our genuine understanding and commitment to their needs.

Concise Branch Selector:

- In the top right corner, next to the heading, we've implemented a concise and simplified branch selector. This minimizes space usage while easily displaying the available branches, enhancing user experience and navigation efficiency.

Gratitude Message and Shortcuts:

- At the bottom of both the verified and non-verified versions of the organisation page, a brief but impactful thank you message is accompanied by shortcuts to their managing pages. This expresses gratitude to volunteer organisations and outlines their capabilities on the platform. By prioritizing their role and providing tailored functionalities, we maintain good relations and engagement with the core of our website.

Kinematic and Cognitive Load:

These design choices reduce cognitive load by simplifying complex processes and providing clear navigation options. The streamlined signup process and concise branch selector enhance kinematic load by facilitating smooth interaction and navigation. Overall, these considerations optimize user experience and promote efficient engagement with the platform.

The screenshot displays two views of a volunteer opportunities page. On the left, a list of five program cards is shown, each with a title, organization name, three tags (Tag 1, Tag 2, Tag 3), and a detailed description. On the right, a comparison with seekVolunteer shows their search interface with categories like Opportunities, Favourites, and Advice & Tips, and a search results page for Australia with filters for category, type of work, and suitable for.

Inspiration from seekVolunteer:

Our main volunteer opportunities page takes cues from seekVolunteer, particularly in the search categories and the layout of opportunity boxes. We found their color scheme visually appealing, particularly the clear distinction between the link to the full post from the title versus the description. This design choice reduces cognitive load by enhancing user navigation and making it easy for users to find further information.

Prominent Organization Logos:

Each organization's logo is prominently displayed next to the blocks of text, improving the scanability of the webpage. This visual communication reduces kinematic load by allowing users to quickly recognize which opportunities come from which organization, enhancing their overall experience.

Kinematic and Cognitive Load:

By simplifying navigation and providing clear visual cues, such as distinct color schemes and prominent logos, we reduce cognitive load and enhance user experience. Additionally, the placement of elements improves scanability, reducing kinematic load and making it easier for users to locate relevant information quickly.

You are ready to bring joy and companionship to the lives of seniors in our community? Join our volunteer program at the heart of our aged care facility and make a meaningful impact every day!

As a volunteer, you'll have the opportunity to brighten the days of our residents through engaging activities, heartfelt conversations, and compassionate care. Whether you have a knack for arts and crafts, enjoy playing games, or simply love spending time with others, there's a role for you here.

You'll be welcomed into our warm and supportive environment, where your kindness and dedication will truly make a difference. Whether you're assisting with daily activities, helping residents stay active and engaged, or simply lending a listening ear, your presence will be cherished and valued.

Our volunteer program is flexible to accommodate your schedule, whether you can spare a few hours a week or wish to make a more significant commitment. You'll receive training and ongoing support to ensure you feel confident and empowered in your role.

The rewards of volunteering in aged care go far beyond the tasks you perform. You'll form meaningful connections with residents and staff alike, creating bonds that touch both your life and theirs. Your efforts will bring smiles, laughter, and a sense of belonging to those we serve.

Join us in creating a nurturing and vibrant community where seniors thrive and feel cherished. Apply now and become a vital part of our mission to provide compassionate care and companionship to those in need. Together, we can make every day brighter for our beloved seniors. Let's make a difference, one heartfelt moment at a time!

Opportunities/Guest

Inspired by seekVolunteer, we implemented the well-laid-out information and clear visibility of logos. We implemented tags with their own symbols, enhancing universal visual

communication for a broader audience and facilitating easier scanability. To further improve clarity, we opted to distinguish the right side of the information with a grey backing, creating a clear separation between the event details and its description. This design choice streamlines the presentation of information, providing a concise summary of the volunteer opportunity's expectations.

Google Maps Integration:

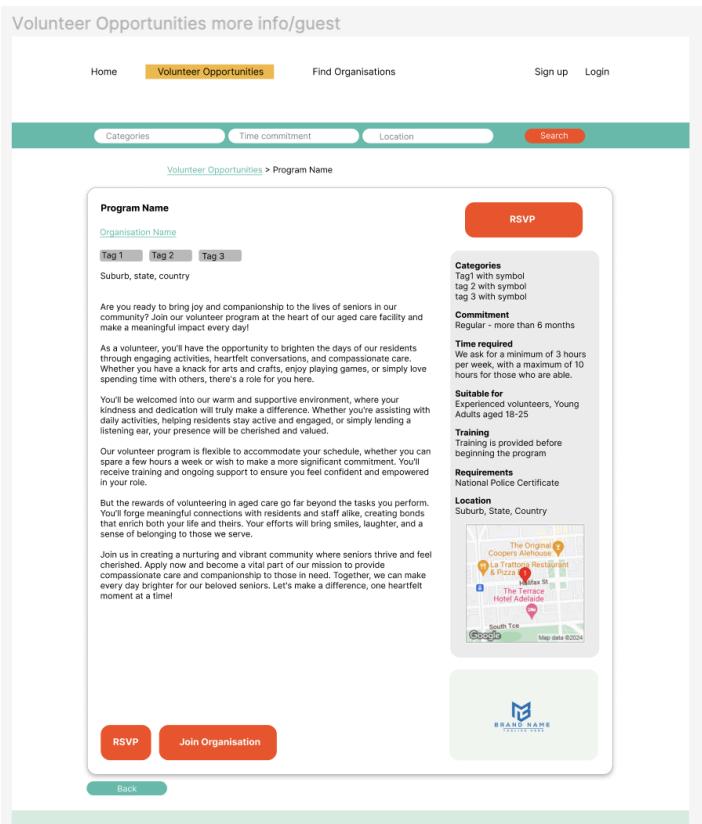

The inclusion of the Google Maps API allows users to instantly locate and save the event location when they RSVP, a necessary implementation for enhanced user experience. This feature simplifies the process of finding and navigating to the event location, reducing cognitive load and improving user satisfaction.

Differentiation for Logged-In Users:

One key difference between this opportunity post and the versions for logged-in volunteers and organizations is that guest users cannot RSVP or join the organization. This distinction ensures that the user experience is tailored to each user's specific needs and privileges, enhancing engagement and usability.

Kinematic and Cognitive Load:

Through careful design choices such as clear visual cues, distinct color schemes, and streamlined information presentation, we reduce cognitive load and enhance user experience. Additionally, the integration of the Google Maps API simplifies navigation and location-based tasks, further improving user satisfaction and engagement. These considerations optimize the platform's usability and accessibility, promoting efficient interaction and user retention.

Opportunities/Volunteer

User Experience Enhancements:

In the Opportunities/Volunteer section, the absence of the sign-up message distinguishes it from other sections. This streamlined approach eliminates unnecessary prompts, reducing cognitive load and allowing users to focus on exploring volunteering opportunities.

RSVP Confirmation and Email Opt-In:

After users RSVP and join an opportunity, they encounter a confirmation page that validates their selection. The inclusion of a checkbox for email opt-in offers another layer of personalization to our website, catering to user preferences and enhancing engagement. This feature reduces cognitive load by simplifying

the process of opting in for emails and provides users with greater control over their experience.

Kinematic and Cognitive Load:

These design choices streamline the user experience by eliminating unnecessary prompts and simplifying complex processes, reducing cognitive load. Additionally, the inclusion of personalized features such as RSVP confirmation and email opt-in enhances user engagement and satisfaction. By optimizing the platform for efficient interaction and user control, we aim to improve overall usability and retention.

The image consists of two side-by-side screenshots of a web application interface. The left screenshot shows a list of volunteer opportunities under the heading 'Volunteer Opportunities'. It includes a search bar, filters for 'Categories', 'Time commitment', and 'Location', and a 'Create Post' button. Below the search bar, there is a dropdown menu labeled 'Current Branch'. The list displays several items, each with a 'Program Name', 'Organisation Name', 'Tags' (labeled 'Tag 1', 'Tag 2', 'Tag 3'), and a descriptive text block. The right screenshot shows a 'Create Volunteer Opportunity Post' form. It has sections for 'Program Name', 'Address', 'Training', 'Requirements', 'Brief Description', 'Complete Description', and 'Event Type'. Each section contains input fields and a 'Post' button at the bottom right. The top navigation bar includes 'Home', 'Volunteer Opportunities', and 'Updates'.

Opportunities/Organisation

Customized Branch Viewing:

Unlike the volunteer and guest pages, this page exclusively displays posts relevant to the selected branch. This focused approach eliminates clutter and ensures managers can easily detect and access the post creation button.

Branch Selection:

The branch selection feature, located at the top of the page, mirrors the main page's design for consistency. This placement aligns with visual hierarchy principles, making it intuitive for users to filter posts by branch.

Post Creation Form:

The post creation form features a universal design with placeholder text in a lighter grey and white to indicate input areas. This elegant yet concise style enhances usability and ensures input fields are easily recognizable. Additionally, a character count indicator in the text input area helps users maintain valid input, reducing errors and enhancing user experience.

Efficiency in Form Completion:

Drop-down selections for tags, event types, and commitment types streamline the form completion process, minimizing the effort required from users. This design choice reduces cognitive load by simplifying complex tasks and ensuring a smooth and efficient process for posting volunteer opportunities.

Extra info on program:

When the organisation clicks on one of their programs it will display what the users can also see with further information on the program. Furthermore, they are able to view all the RSVP'd users and remove them if they desire.

Kinematic and Cognitive load:

These design choices optimize kinematic load by facilitating smooth navigation and interaction, while also reducing cognitive load by simplifying complex tasks and providing clear visual cues. Overall, these considerations enhance the user experience, making the platform more intuitive and user-friendly.

The screenshot shows a web page titled 'Find Organisations'. At the top, there are navigation links for 'Home', 'Volunteer Opportunities', 'Find Organisations' (which is highlighted in yellow), 'Sign up', and 'Login'. Below this, a green header bar contains the text 'Volunteer Organisations' and three filter buttons: 'Categories', 'Location', and 'Organization Name', followed by a 'Search' button. The main content area displays a list of organization cards. Each card has a title 'Organization Name' (e.g., 'Organization Name'), a brief description starting with 'Founded on the principles of compassion, collaboration, and commitment, we strive to create positive change in the world through volunteering. Our organization serves as a platform for individuals from all walks of life to come together and contribute their time, skills, and resources to meaningful causes. Volunteer things. We do those. Yeah.', and a red 'Join' button. There are ten such cards visible on the page.

Find Organisations — Guest & Volunteer

Each organization's title is prominently displayed in the main color (cyan) and hyperlinked for easy access to more information. This design choice ensures branding consistency, draws attention to the titles, and allows for seamless navigation. By reducing cognitive load through clear visual cues, users can quickly locate and explore organizations of interest.

Short Description:

- Below each title, a brief overview of the organization is provided to help users make informed decisions about their interest. This concise presentation minimizes cognitive load by providing relevant information in a digestible format, enhancing user experience and engagement.

Logo Display:

- The inclusion of each organization's logo enhances brand recognition and adds a visual element to the page. This improves scanability and reduces kinematic load by allowing users to quickly identify familiar organizations and navigate the page efficiently.

"Join" Button:

- A prominent "Join" button below each organization's logo provides a clear call to action, encouraging user participation and sign-ups. This strategic placement minimizes cognitive load by guiding users towards desired actions and facilitating engagement with the platform.

Kinematic and Cognitive Load:

Through clear visual cues, concise presentation of information, and strategic placement of elements, we optimize both kinematic and cognitive load. By reducing the effort required for users to navigate and engage with the page, we enhance overall usability and user satisfaction, promoting continued participation within the community.

Updates

The screenshot shows a web page titled 'Updates/volunteers'. At the top, there are navigation links: Home, Volunteer Opportunities, Find Organisations, RSVP'd, and Updates. Below these, a sub-navigation bar shows 'Updates' is selected. On the left, a sidebar lists 'Joined Organisations' with items like 'Organisation 1', 'Organisation 2 ✓', 'Organisation 3 ✓', and 'Organisation 4'. The main content area displays a stream of five 'Important Update' cards. Each card includes the organization name (e.g., 'Organisation Name'), the date posted (e.g., 'Date posted (most recent)'), and a small placeholder for 'Logo of the organisation'. Below the cards, a red 'Next Page' button is visible. At the bottom of the page, there is a footer with links: Home, Volunteer Opportunities, Updates, Contact Us, and Logout.

Updates/Volunteer

The Updates/Volunteer page is divided into two main sections: a filter for selecting specific organization updates and the main stream of updates. The intentional display of the number of posts at the top of the updates stream provides users with an indication of the volume of content available to browse or filter through, depending on their organization affiliations. Additionally, the inclusion of page numbers allows users to easily track their progress and reference specific pages for future use.

Dynamic Pagination:

- The implementation of dynamic pagination includes a "previous page" button that appears once the page number exceeds 1, enhancing usability and navigation efficiency. This feature reduces cognitive load by simplifying the process of navigating through multiple pages of updates, providing a seamless browsing experience for users.

Efficient Update Presentation:

- Updates are presented as short descriptions or information updates for events, eliminating the need for a separate page for each post. This design choice minimizes cognitive load by streamlining the user interface and reducing unnecessary clicks for accessing update details. Furthermore, the placement of the organization's logo alongside the text creates a sense of balance and professionalism, enhancing the overall visual appeal and usability of the page.

Kinematic and Cognitive load:

Through clear navigation cues, dynamic interface elements, and streamlined presentation of information, we optimize both kinematic and cognitive load. By reducing the effort required for users to navigate and engage with the page, we enhance overall usability and user satisfaction, promoting continued participation within the community.

Updates/Organisation

Inspiration was taken from Twitter in their form of posting. We believed that their implementation of a post form was the most intuitive, especially as Updates from the organisation work similarly to the nature of the website Twitter. This familiar format is especially comforting for the organisations that use it. Consistent across all our forms on our website, the same coloured placeholders phrase enclosed within a white box to indicate input.

At the top of the page, users can select the specific branch for which they want to view updates. This focused approach reduces kinematic load by simplifying navigation and allowing users to quickly access relevant information.

Kinematic and Cognitive load:

The image shows two side-by-side screenshots. On the left is a screenshot of a web-based 'Updates/organisations' page. It features a header with 'Home', 'Volunteer Opportunities', and a yellow 'Updates' button. Below this is a section titled 'Updates' with a red 'Current Branch' dropdown set to 'New Post'. There are three 'Important Update' cards, each with a placeholder text area and a 'Post' button. At the bottom is a green footer with links for 'Home', 'Volunteer Opportunities', 'Updates', 'Contact Us', and 'Logout'. On the right is a screenshot of the Twitter 'For you' feed. It shows a dark-themed feed with a blue 'Post' button. Two tweets are visible: one from 'bee' (@shadowqnights) about new customs maps, and another from 'Lorna Rose Treen' (@lornlornlors) about a passport drama. Each tweet includes standard Twitter interaction icons (comment, retweet, like, bookmark, share).

The screenshot shows a web application interface titled "RSVP'd volunteer". At the top, there are navigation links: Home, Volunteer Opportunities, Find Organisations, **RSVP'd**, and Updates. A search bar is present with the placeholder "Name". Below the header, a section titled "Your RSVPs" displays a list of 8 RSVPs. Each item in the list includes fields for "Program Name", "Organisation Name", and "Tags" (Tag 1, Tag 2, Tag 3). A "Logo of the organisation" placeholder is shown next to each entry. A note below the first entry states: "Description of program that extends really far so they can put in lots of words so they are long and they go for multiple lines. Repeating lots of information but in a super concise way. This looks so good with multiple lines. Click for more info!". A "Page 1/2" indicator is at the bottom of the list. At the very bottom of the page, there are links: Home, Volunteer Opportunities, Find Organisations, Contact Us, Sign up, and Login.

RSVP'd — Volunteer Specific

The RSVP'd page provides a filtered version of the Volunteer opportunities. It is necessary to separate these pages from one another as two pages perform different purposes. For the Volunteer Opportunities page specifically, this is for browsing new opportunities, rather than reviewing old opportunities that you have already joined.

This creates a clear distinction as the RSVP'd page would only consist of your commitments that you can easily filter through. The user is not only saved from extra effort to find what events they have already joined, but also have a convenient look up with its own personalised search bar.

The screenshot shows a web application interface titled "Joined Volunteers". At the top, there are navigation links: Home, Volunteer Opportunities, Updates, **Joined Volunteers**, and a dropdown menu "Current Branch". A search bar is present with the placeholder "Name". Below the header, a section titled "Joined Volunteers" displays a list of 42 joined users. Each item in the list includes fields for "User First and Last Name" and "theirEmail@gmail.com". A "Remove" button is located to the right of each entry. A note above the first entry states: "User First and Last Name theirEmail@gmail.com". A "Page 1/42" indicator is at the bottom of the list. At the very bottom of the page, there are links: Home, Volunteer Opportunities, Updates, Joined Volunteers, Contact Us, and Logout.

Joined Volunteers - Organisation Specific

The Joined Volunteers page allows the organisation to view all the volunteers who have joined their specific branches and can choose to remove them if they so desire. We have included the total number of joined volunteers and the number of pages of users the organisation has to assist in reducing cognitive load so they can easily determine the number of volunteers they have.

Sign Up

For our sign up page, we have split it into two forms but on the same page. The forms are simply toggled by selecting either the User (Volunteer) or Organisation. The purpose of this is to remove the extra step of having an entirely new page for a user log in versus an organisation's log in, hence the combination of both for the ease of universal users.

The image shows two versions of a sign-up form side-by-side. Both forms have a header with 'Sign up' and 'Login' buttons. The left form is titled 'Sign up/User' and includes fields for Name (First name, Last name), Set Password, Date of Birth, Location (Suburb, State, Postcode, Country), and a 'Sign up' button. The right form is titled 'Sign up/Organisation' and includes fields for Company Name, Set Password, Location (Suburb, State, Postcode, Country), and a 'Sign up' button. Both forms also feature a 'Sign up with Google' button at the bottom.

Sign Up / Volunteer and Sign up / Organisation

All inputs are according to our standard form. The only difference is that the organisation sign up process has a few extra steps which are seen in the home page of when the organisation first logs in.

Kinematic and Cognitive load:

The image shows a 'Sign in' page with a 'Login' form. The form includes fields for Email and Password, a 'Forgot password?' link, and a 'Login' button. Below the form is a link 'Don't have an account? [Sign up today](#)'. The page also features a navigation bar with 'Home', 'Volunteer Opportunities', 'Find Organisations', 'Sign up', and 'Login' buttons.

Log In

The log in page is standard, with the bolded heading and the two inputs of the email and password of the user. If the user were to forgot their password, we chose to put the hyperlink where if pressed, an email will be sent to their account that was linked to the one trying to sign in. The confirmation of this happening will be just below the "Forgot password?" text. This maintains

everything in the same location in terms of the log in box, and reduces the need for further cognitive load. The log in button is simple and in the tertiary colour, bright orange, thus distinguishing itself from the neutral background, improving readability and accessibility for those who may be visually impaired.

Additionally, we have an extra option of signing in with Google to further our accessibility.

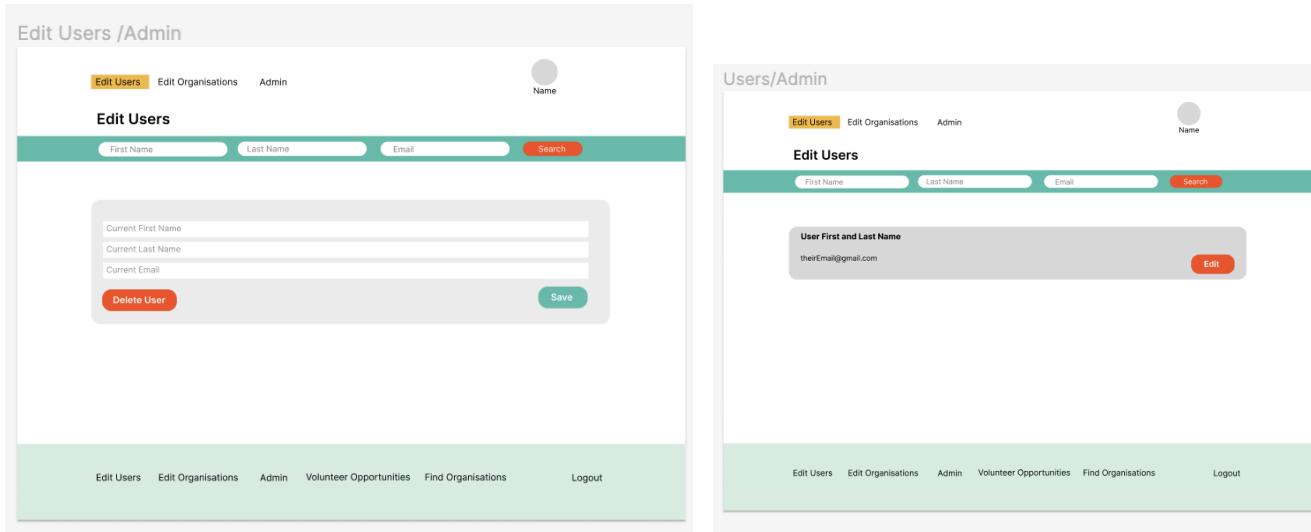

Below the grey container, we have a prompt encouraging the person who may have accidentally clicked log in rather than sign up to be redirected by clicking the link. This ease of access allows the user to easily navigate to the correct page.

Organisation Specific — Registering branch

When the organisation chooses to create a new branch, they are redirected to the new branch page where they can input their branch details. We have used placeholder values in the text input fields so that it makes it easier for the user to know what to put in the inputs. We also created the send request button following our colour scheme of the bright orange to make the button stand out to the user.

Kinematic and Cognitive load:

To minimise the cognitive load the user can easily determine what the user should write in the input fields as there are placeholder values stating what should be inputted. These values are in the light grey colour to show that they are not the final values, but rather, the user needs to input in their own values. This also follows standard design of other website inputs to make it more intuitive and standard for the user. To reduce the kinematic load The send request button is in the bottom right hand corner of the branch request box. This way the user would have had their cursor last at the country input, so they only need to move their cursor a small amount to the bottom and then right. This follows also follows standard website design and most other websites have their confirm buttons in the bottom right and corner of their forms.

Admin Specific

Edit User

When the admin wants to search for a user, they are able to enter in their first name, last name, and email, in the text fields. This will then display the current user information with an edit button. The user first and last name is in bold and larger text to make it easier for the admin to check that it is the correct user they searched for. When the admin wants to edit a user they are shown the current user information in the text input fields, which they can then write over with the new information. When they click save, a pop up will display in bright yellow (following our colour scheme) to alert the user they have saved. In contrast, when the admin clicks the delete user button, a pop up will appear to confirm that the admin does want to delete the user, where they have to click either the back button or the delete button. Having multiple steps to delete a user ensures that the admin does not accidentally deletes a user.

Kinematic and Cognitive load:

To reduce the cognitive load the delete user and save buttons are on opposite sides of the page and in different colours. The delete user is coloured to be the bright orange to stand out and be a “warning colour”, whereas the save button is in the teal colour as it is associated to be more of a “safe” and “save” colour. Furthermore, the save button is in the bottom right hand corner of the box, as this is where the users typically know to click a button, whereas the delete user is in the bottom left as this is a less commonly used spot so the user must think more to move their cursor to this location. Thus, there is more thought process that goes to moving the cursor to the delete user button, ensuring that there is less chance of an accident occurring when the admin deletes a user. To reduce the kinematic load, the input fields are located directly below each other to follow the mind flow of moving from one field to another, by simply moving down the cursor.

Edit Organisation

To view organisation details the admin can search for an organisation name and email. This will bring up information about the organisation, which admin can then choose to edit, as well as the current branch requests from the organisation, and the current branches. The admin can choose to accept or reject the branch requests by clicking on the respective buttons, and they can also choose to remove current branches. Finally, when clicking the edit information, the admin can change the organisation name, email, and their description.

Kinematic and Cognitive load:

To reduce the cognitive load, the remove and reject buttons are in the bright orange “warning” colours, whereas the accept button is in the teal “safe” colour. Furthermore, the accept and reject buttons respectively have a tick and a cross. Utilising symbols helps to visually engage the user and make symbol queue so that they don’t need to read every line of text to understand what the buttons do. We have also put lines between the branch names to make it easier for the user to line up the accept/reject/remove buttons with the associated branch. This also helps to

reduce kinematic load, as the user can move their cursor along the line following from the branch to the buttons.

The image shows two side-by-side screenshots of a web application interface. Both screenshots have a header "Admin/Admin" and a navigation bar with links: "Edit Users", "Edit Organisations", "Admin" (which is highlighted in yellow), "Name", and "Logout".

Left Screenshot (Create New Admin Page): This screenshot shows a form titled "Create New Admin". It has four input fields: "Email" (placeholder "Email"), "Confirm Email" (placeholder "Confirm Email"), "Name" (placeholder "First name" and "Last name" combined), and "Set Password" (two fields: "Enter password" and "Confirm password"). A red "Create" button is at the bottom right of the form.

Right Screenshot (Success Page): This screenshot shows a confirmation message: "Successfully created! Expect an email to their_email@gmail.com shortly confirming." Below it is a "Continue back to Admin..." button. The bottom navigation bar includes "Edit Users", "Edit Organisations", "Admin", "Volunteer Opportunities", "Find Organisations", and "Logout".

Creating new Admin

To create new admin, the current logged in admin fills out a form requesting admin information. Once the create button is clicked they are provided with a pop up telling them the admin account was successfully created and an email was sent to the new admin account. They can then be redirected back to the create an admin page.

Kinematic and Cognitive load:

To reduce the cognitive load, the user is prompted what to write in each of the input fields using a placeholder value. The create button is also coloured the bright orange colour to stand out to the admin. Furthermore, having the confirmation pop up helps the admin understand our system and that the new admin account has been created and there is nothing further they need to do. To reduce the kinematic load, the text inputs are close together (while still remaining navigable and readable).

The image displays three wireframe screenshots of setting pages, each with a header, navigation bar, and a main settings section.

- Settings/User:** Shows fields for changing email (New Email, Confirm New Email), setting a name (First name, Last name), resetting a password (Current password, New password, Confirm new password), and specifying location details (Suburb, State, Postcode, Country). It includes a checkbox for opting out of email notifications and a 'Delete Account' section with email and password fields.
- Settings/Organisation:** Shows fields for changing organisation details (Email, Organisation Name, Organisation Webpage URL), setting a name (Name), resetting a password (Current password, New password, Confirm new password), and specifying location details (Suburb, State, Postcode, Country). It includes a checkbox for opting out of email notifications and a 'Delete Account' section with email and password fields.
- Settings/Admin:** Shows fields for changing user details (Email, Name), resetting a password (Current password, New password, Confirm new password), and specifying location details (Suburb, State, Postcode, Country). It includes a 'Delete Account' section with email and password fields, a 'Save' button, and a 'Delete' button.

Each page has a header with 'Name' and a navigation bar at the bottom with links like Home, Volunteer Opportunities, Contact Us, and Logout.

Settings

We have created multiple setting pages depending on how the user is logged in (as a user, organisation, or admin). We have set the text input field placeholders to be the current values stored for the user so they know what they are changing their information from. Furthermore, for the user and organisation setting page, there is a check box letting them unsubscribe from all email notifications. For all pages there is an option to delete the account, in which the user must enter in their email and password to confirm delete.

Kinematic and Cognitive load:

To reduce cognitive load, the text field placeholders are set to the current values so the user knows the type of information that needs to be inputted. Furthermore, each field has a title above it further helping the user understand what information needs to be provided. Additionally, to ensure that the user doesn't accidentally delete their account, the delete account is separated by a bar from the save information, to make it clear that it is a separate section. To reduce kinematic load, the text input fields are located close together and directly below each other so the user does not need to move their cursor all over the page, but rather small increments at a time.

Final Design on Figma

The screenshot displays the final design of a volunteer website on a desktop browser. The top navigation bar includes links for Home, Volunteer Opportunities, Find Organisations, Sign up, and Login. The main header features a smiling man holding a cardboard box with the text "Make your mark, Volunteer with heart." and a "Volunteer today" button. Below this, a call-to-action section encourages users to find local opportunities, accompanied by a heart icon and two thumbnail images: one showing people volunteering outdoors and another showing a group of volunteers in t-shirts. A "Why volunteer?" section highlights three benefits: Community Impact, Personal Growth, and Social Connection, each with a corresponding icon. A dashed-line box at the bottom contains the text "So, what are you waiting for? Join the [user count] volunteering with us today!" and a "Sign up now" button. The footer mirrors the top navigation.

Make your mark,
Volunteer with heart.

Volunteer today

Find your local volunteering opportunities today! 

Volunteering Opportunities Volunteer Organisations

Why volunteer?

Volunteering involves giving your time, skills, and energy to help others or contribute to a cause without expecting monetary compensation. It can take various forms, from serving meals at a local shelter to tutoring students, participating in environmental clean-up efforts, or assisting in community events.

1. Community Impact

Volunteering allows you to directly contribute to the well-being of your community by addressing critical needs such as hunger, education, or environmental conservation.

2. Personal Growth

Through volunteering, you can develop new skills, gain valuable experiences, and expand your perspective by interacting with diverse groups of people and facing new challenges.

3. Social Connection

Volunteering provides opportunities to connect with other individuals who share your passion for making a difference, fostering a sense of belonging and camaraderie within your community.

So, what are you waiting for? Join the [user count] volunteering with us today!

Volunteering Opportunities

Volunteer Organisations

You've joined [insert number] of people making a mark on this world.

Volunteering is difficult, we understand that. But remember, sometimes times can be tough and you need a break. If you use up all that empathy and kindness for everyone else, who will take care of you?

1. Stay hydrated
Regular water breaks are crucial in keeping you healthy and in the right health to take care of others.

2. Take it easy
Volunteering can be physically demanding. Even if you push through it with your best attitude, take time for a break, time for yourself.

3. Ask for help
It can be confronting sometimes. Check in on yourself, and if you need further support, or feel unsafe to yourself, please contact below.

Are you ready to bring joy and companionship to the lives of seniors in our community? Join our volunteer program at the heart of our aged care facility and make a meaningful impact every day!

As a volunteer, you'll have the opportunity to brighten the days of our residents through engaging activities, heartfelt conversations, and compassionate care. Whether you have a knack for arts and crafts, enjoy playing games, or simply love spending time with others, there's a role for you here.

You'll be welcomed into our warm and supportive environment, where your kindness and dedication will truly make a difference. Whether you're assisting with daily activities, helping residents stay active and engaged, or simply lending a listening ear, your presence will be cherished and valued.

Our volunteer program is flexible to accommodate your schedule, whether you can spare a few hours a week or wish to make a more significant commitment. You'll receive training and ongoing support to ensure you feel confident and empowered in your role.

But the rewards of volunteering in aged care go far beyond the tasks you perform. You'll forge meaningful connections with residents and staff alike, creating bonds that enrich both your life and theirs. Your efforts will bring smiles, laughter, and a sense of belonging to those we serve.

Join us in creating a nurturing and vibrant community where seniors thrive and feel cherished. Apply now and become a vital part of our mission to provide compassionate care and companionship to those in need. Together, we can make every day brighter for our beloved seniors. Let's make a difference, one heartfelt moment at a time!

Their bio that spans multiple lines. Its very very very long, and it really does span multiple lines, this just takes a while to write multiple lines. Something about how great they are and what you can do to make an impact. They are really important to the world, and your local community. Everyone loves organisation Name. With them you will be satisfied in how you are helping the world, all it takes is just one person to make a difference. Join us today and you wont regret it. We promise!

Are you ready to bring joy and companionship to the lives of seniors in our community? Join our volunteer program at the heart of our aged care facility and make a meaningful impact every day!

As a volunteer, you'll have the opportunity to brighten the days of our residents through engaging activities, heartfelt conversations, and compassionate care. Whether you have a knack for arts and crafts, enjoy playing games, or simply love spending time with others, there's a role for you here.

You'll be welcomed into our warm and supportive environment, where your kindness and dedication will truly make a difference. Whether you're assisting with daily activities, helping residents stay active and engaged, or simply lending a listening ear, your presence will be cherished and valued.

Our volunteer program is flexible to accommodate your schedule, whether you can spare a few hours a week or wish to make a more significant commitment. You'll receive training and ongoing support to ensure you feel confident and empowered in your role.

But the rewards of volunteering in aged care go far beyond the tasks you perform. You'll forge meaningful connections with residents and staff alike, creating bonds that enrich both your life and theirs. Your efforts will bring smiles, laughter, and a sense of belonging to those we serve.

Join us in creating a nurturing and vibrant community where seniors thrive and feel cherished. Apply now and become a vital part of our mission to provide compassionate care and companionship to those in need. Together, we can make every day brighter for our beloved seniors. Let's make a difference, one heartfelt moment at a time!
